How to Extend FeatureIDE

Thomas Thüm

July 12, 2010

Preparing Eclipse 1/2

- ▶ Download Eclipse: <http://www.eclipse.org/downloads/>
 - ▶ 3.6 (Helios) is recommend (should also work with 3.4 and 3.5)
 - ▶ Choose "Eclipse for RCP and RAP Developers" that you can access sources of Eclipse standard plug-ins
- ▶ Unzip Eclipse
 - ▶ Make sure that you have all permissions for the directory (do not use Windows program files folder)
- ▶ Create a shortcut and VM parameters: `.../eclipse.exe -vmargs -Duser.name="Name Surname" -Xmx1024M`
- ▶ Start Eclipse and create a new workspace

Preparing Eclipse 2/2

- ▶ Install Subclipse
`http://subclipse.tigris.org/update_1.6.x`
- ▶ Install CDT (can be skipped if you not intend to work with the FeatureC++ plugin) `http://download.eclipse.org/tools/cdt/releases/helios`
- ▶ Download FeatureIDE plugins at the path `/trunk/plugins` from our SVN repository `https://faracvs.cs.uni-magdeburg.de/svn/tthuem-FeatureIDE`
- ▶ Create a new run configuration for Eclipse Applications and enable tracing for all FeatureIDE plugins (named `de.ovgu.featureide.*`)
